PROFESSIONAL SUMMARY

Software Engineer with a BSc in Software Engineering and over a year of professional experience building full-stack web and mobile applications with React, Next.js, TypeScript, Node.js, NestJS, and PostgreSQL. Experienced in delivering ERP, supply chain, and inventory systems, integrating RESTful APIs, and working in agile, cross-functional teams. Strong interest in AI-enabled products, requirements engineering, and project management.

TECHNICAL SKILLS

Frontend: React, Next.js, React Native, JavaScript, TypeScript, HTML, CSS, Tailwind CSS
Backend: Node.js, Express.js, NestJS, Laravel, PHP, RESTful API Development
Databases: PostgreSQL, MySQL, SQL, Firebase, TypeORM
Tools and Practices: Git, GitHub, Agile/Scrum, Code Review, Debugging and Testing, Technical Documentation, Requirements Gathering
Other: Machine Learning (Python), Project Management

WORK EXPERIENCE

Technical Engineer | IE Networks Solution

Addis Ababa, Ethiopia | 04/2026 – Present

- Design, develop, and maintain scalable full-stack software solutions that support business operations and improve system efficiency.
- Collaborate with developers, designers, project managers, and stakeholders to deliver solutions aligned with business requirements.
- Contribute to system architecture, database management, API development, and deployment processes.
- Monitor, troubleshoot, and resolve technical issues to maintain system reliability, performance, and security.
- Take part in requirements gathering, technical documentation, testing, and software optimization.
- Apply version control, code reviews, and agile workflows; identify process inefficiencies and propose technical improvements.

Fullstack Developer | Prime Integrated Services

Remote, Part-Time | 10/2025 – Present

- Develop frontend and backend features for an AI-enabled education ERP system.
- Build and integrate APIs and database operations to support core ERP modules.

Junior Frontend Developer | IE Networks Solution

Addis Ababa, Ethiopia | 07/2025 – 04/2026

- Developed responsive, user-friendly web applications using React, Next.js, JavaScript, and TypeScript.
- Designed and implemented reusable UI components that improved development efficiency and consistency across applications.
- Integrated RESTful APIs and optimized data flow between frontend and backend systems.
- Contributed to backend development, database operations, and full-stack feature implementation.
- Assisted with debugging, testing, and performance optimization to improve application speed, reliability, and user experience.
- Collaborated with designers, backend developers, and project managers to deliver scalable solutions.

Software Engineer Intern | National ID Program (Fayda Digital ID)

Addis Ababa, Ethiopia | 10/2024 – 01/2025

- Developed updates to the official Fayda Digital ID website as a frontend engineer.
- Built user interfaces for pages of the Fayda mobile app, replicating the features of the Fayda mini app on Telebirr, under the supervision of the senior frontend team.
- Designed an onboarding portal for clients and organizations partnering with the National ID Program.

PROJECTS

Supply Chain Management (SCM) System

Laravel, PHP, SQL, JavaScript, Git | 07/2025 – Present

- Built frontend and backend features for procurement, sourcing, approvals, payables, supplier management, and statement of accounts (SOA) processing.
- Developed responsive interfaces, integrated APIs, handled database operations, and improved system workflows.
- Debugged, tested, and optimized application performance; supported users and stakeholders.

Project Management System

Full-stack | 07/2025 – Present

- Developed frontend and backend functionality for project creation, bill of quantities management, and budget handling.
- Debugged, tested, and optimized performance; provided support to stakeholders to keep modules running smoothly.

Inventory Management System (IMS)

Full-stack | 07/2025 – Present

- Built modules for inventory tracking, stock management, product handling, reporting, and user management.
- Developed responsive UIs, integrated APIs, managed database interactions, and improved workflow efficiency.

SmartRecruit – Applicant Tracking System

React, NestJS, PostgreSQL, TypeORM

- Built an applicant tracking dashboard for HR professionals to monitor application progress through the recruitment process.
- Implemented email notifications for acceptance and rejection decisions within one week.

EduConnect – Personalized Learning System

React Native, Firebase, Python

- Developed a mobile learning app that uses machine learning to tailor computer science materials to each learner's performance.

EDUCATION

BSc in Software Engineering | Hilcoe School of Computer Science and Technology
01/2021 – 02/2025

CERTIFICATIONS

- Fundamentals of NestJS – NestJS, June 2025
- Certified React Developer – W3Schools, May 2025
- AI Enhanced Project Management – 10Academy, October 2024
- AI Career Essentials – ALX Ethiopia, August 2024
